

**Senior Quality Engineer - Factory Engineering
(49200372)**

Senior Quality Engineer - Factory Engineering (49200372)

Job Level

Individual Contributor

Job Functional Area

Factory Engineering (CA)

Job Family

Factory Engineering

Job Grade

8

Career Stream - Career Level

Professional - Senior Professional (P2)

Major Purpose

Applies Quality tools to formulate/facilitate quality plans for new product within the factory Product Delivery Teams, Order Fulfillment Teams, Supply Management Teams and/or Customer Support Teams. Encourages early and ongoing interaction between manufacturing, engineering, suppliers and customers to identify and solve all quality issues. Coordinates the activities and resources in the Quality Support function to meeting quality objectives and drive continuous improvement.

Major Duties

- Contribute to the analysis of information and the specification of the methods and process steps, as well as the plant, machinery, and equipment, required to design and continuously improve manufacturing or materials processes and process systems to deliver the end product within specified cost and quality parameters.
- Contribute to the design of engineering solutions; design the feasibility testing approach and supervise its implementation to support the development and validation of engineering solutions.
- Contribute to the analysis of information, the drafting of engineering standards and specifications, and the evaluation of the effectiveness of those standards within own engineering discipline to inform engineering work in the organization and/or of its suppliers, contractors, and consultants.
- Carry out inspections to evaluate the quality of engineering works and/or the integrity of existing installations or structures, and specify the remedial works needed to ensure conformance with specifications and regulatory requirements.
- Deliver required outcomes by managing day-to-day relationships with contract service providers while working within an established contract management plan.
- Identify shortcomings in existing processes, systems, and procedures, and use established change management programs to address them.
- Help others get the most out of knowledge management systems by offering support and advice.
- Carry out a range of product development and engineering activities. Use established systems to analyze customer needs and define and deliver products.
- Work within an established project management plan to achieve specific goals.

Note on Competency Translations

Competencies are translated for use in other Talent Central modules. Other job profile translations will not be available.

Competencies

Ensures accountability

Holding self and others accountable to meet commitments.

Manages complexity

Making sense of complex, high quantity, and sometimes contradictory information to effectively solve problems.

Decision quality

Making good and timely decisions that keep the organization moving forward.

Optimizes work processes

Knowing the most effective and efficient processes to get things done, with a focus on continuous improvement.

Plans and aligns

Planning and prioritizing work to meet commitments aligned with organizational goals.

Communicates effectively

Developing and delivering multi-mode communications that convey a clear understanding of the unique needs of different audiences.

Skills, Abilities, Knowledge

Engineering Technology

Works without supervision and provides technical guidance when required on how to get results using new and advanced engineering technologies. Proficiency Level 3

Engineering Design

Works without supervision and provides technical guidance as needed on executing engineering designs using the appropriate methods, tools, processes and software. Proficiency Level 3

Engineering Development

Works without supervision and provides technical guidance as needed on achieving engineering development targets using appropriate methods, tools, processes and software. Proficiency Level 3

Business Requirements Analysis

Works without supervision and provides technical guidance when required on analyzing the business requirements that IT solutions must meet. Proficiency Level 3

Engineering Specification

Works without supervision and provides technical guidance when required on producing technical engineering specifications and related materials. Proficiency Level 3

Engineering Testing

Works without supervision and provides technical guidance when required on testing, evaluating and improving engineering outcomes. Proficiency Level 3

Project Schedule Management

Works without supervision and provides technical guidance when required on sequencing and scheduling tasks into a project plan. Proficiency Level 3

Engineering Build

Builds engineering solutions without supervision and provides technical guidance on these solutions as needed. Proficiency Level 3

Engineering Implementation

Works without supervision and provides technical guidance when required on implementing engineering designs, evaluating outcomes and then making improvements as needed.	Proficiency Level 3
Engineering Technical Operations Support	
Works without supervision and provides technical guidance when required on identifying and diagnosing operational problems, then developing engineering solutions to resolve those issues.	Proficiency Level 3
Health and Safety	
Manages and applies safe systems of work without supervision and provides technical guidance when required.	Proficiency Level 3
Negotiation	
Negotiates without supervision and provides technical guidance when required on how to help the organization by obtaining consensus between two or more internal or external parties who may have different interests.	Proficiency Level 3
Policy and Regulation	
Works without supervision and provides technical guidance when required on interpreting and applying knowledge of laws, regulations and policies in area of expertise.	Proficiency Level 3
Review and Reporting	
Works without supervision and provides technical guidance when required on reviewing and creating relevant, lucid and effective reports.	Proficiency Level 3
Risk Management Techniques	
Identifies, assesses, prioritizes and manages risks without supervision and provides technical guidance when required.	Proficiency Level 3
Contract Management	
Supervises the construction of assigned properties according to instructions without supervision and provides technical guidance as needed.	Proficiency Level 3
Costing and Budgeting	
Works without supervision and provides technical guidance when required on costing, budgeting and finance tasks.	Proficiency Level 3

Education

Bachelor's Degree or Equivalent Level

Certifications

Work Experience

Basic experience of coordinating the work of others (4 to 6 months)

Experience enables job holder to deal with the majority of situations and to advise others (Over 3 years to 6 years)
