

Landing Page A/B Variant System

Impact Bullet Equation Lead Magnet — launchtolead.io

Last updated: March 8, 2026

File: `landing/landing-variants.js`

Page: `landing/impact-bullet-equation.html`

THE 5 VARIANTS

V1 Control

GA4 ID: `v1-control`

HEADLINE

"Get Your Free Resume Guide...in Under 30 Seconds."

Form fields: First Name + Email

Form position: Below headline

SUBTITLE

"The formula engineers have used to land offers at Google, SpaceX, Ford, John Deere and GE."

CTA button: "Get Your Free Guide" **Form prompt:** (none)

V2 Paid — Graduating Soon `utm_content contains "graduating-soon"`

GA4 ID: `v2-graduating-soon`

HEADLINE

"Resume Guide for Engineering Students"

Form fields: Email only

Form position: Above headline

SUBTITLE

"Show the impact of your classwork, projects, and internships to hiring teams."

CTA button: "Submit"

Form prompt: "Where should I send it?"

V3 Paid — Early-Career Engineers `utm_content contains "early-engineers"`

GA4 ID: `v3-early-engineers`

HEADLINE

"Resume Guide for Early-Career Engineers"

Form fields: Email only

Form position: Above headline

SUBTITLE

"Show the impact and value of your engineering experiences to hiring teams."

CTA button: "Submit"

Form prompt: "Where should I send it?"

V4 Paid — Recently Graduated `utm_content contains "recently-graduated"`

GA4 ID: `v4-recently-graduated`

HEADLINE

"Resume Guide for Recent Engineering Graduates"

Form fields: Email only

Form position: Above headline

SUBTITLE

"Show the impact of your classwork, projects, and internships to hiring teams."

CTA button: "Submit"

Form prompt: "Where should I send it?"

V5 Unpaid — All Engineers `No utm_content (organic, direct, social, Skool, etc.)`

GA4 ID: `v5-organic`

HEADLINE

SUBTITLE

"Resume Guide for Engineers"		"For engineering students, recent grads, and early-career engineers." + "Show the impact of your classwork, projects, and experiences to hiring teams."	
Form fields: Email only	Form position: Above headline	CTA button: "Submit"	Form prompt: "Where should I send it?"

TRAFFIC ROUTING — WHO SEES WHAT

Traffic Source	How They Arrive	What Happens
LinkedIn Ads	URL has <code>utm_content=graduating-soon</code> (or early-engineers, recently-graduated)	50/50 split: v1 vs matching variant (v2 , v3 , or v4)
Unpaid Traffic	No <code>utm_content</code> — LinkedIn posts, Skool, Facebook, direct, SEO, etc.	50/50 split: v1 vs v5
Testing / Preview	URL has <code>?variant=v5</code> (or v1, v2, v3, v4)	Forces that variant — bypasses all split logic
Returning Visitor	Has <code>l1l_variant</code> in <code>localStorage</code>	Locked to their first assignment forever

50/50 SPLIT MECHANICS

Each audience segment has its own counter stored in `localStorage`. The counter increments on every new visitor. **Odd = v1 (control), Even = variant.**

This guarantees a perfect 50/50 at every even number of visitors — critical at low traffic volumes.

Counter Key	Segment	Odd Count →	Even Count →
<code>l1l_counter_graduating-soon</code>	Paid — students	v1	v2
<code>l1l_counter_early-engineers</code>	Paid — early career	v1	v3
<code>l1l_counter_recently-graduated</code>	Paid — recent grads	v1	v4
<code>l1l_counter_unpaid</code>	Unpaid — all engineers	v1	v5

TRACKING — WHERE DATA GOES

System	Event	Variant Field	Example Value
GA4	page_view	page_variant	v5-organic
GA4	lead_form_submit	page_variant	v5-organic
Kit (ConvertKit)	Subscriber created	fields[page_variant]	v5-organic
Kit (ConvertKit)	Subscriber created	fields[utm_source] , fields[utm_medium] , etc.	linkedin, paid-social
Meta Pixel	Lead	—	Tracked by landing URL, not variant
LinkedIn Insight	Page view on thank-you page	—	URL-rule conversion

SELECTION PRIORITY (DECISION TREE)

- 1 URL has ?variant=v5 ?**
→ Force that variant. Used for testing/preview only.
- 2 Returning visitor? (lt1_variant in localStorage)**
→ Use stored variant. Locked forever.
- 3 URL has utm_content ? (paid ads)**
→ Map to audience variant (v2/v3/v4), 50/50 split vs v1.
- 4 No utm_content? (unpaid traffic)**
→ 50/50 split: v1 vs v5. Counter key: lt1_counter_unpaid.

PREVIEW URLS (FORCE ANY VARIANT)

v1: launchtolead.io/landing/impact-bullet-equation.html?variant=v1

v2: launchtolead.io/landing/impact-bullet-equation.html?variant=v2

v3: launchtolead.io/landing/impact-bullet-equation.html?variant=v3

v4: launchtolead.io/landing/impact-bullet-equation.html?variant=v4

v5: launchtolead.io/landing/impact-bullet-equation.html?variant=v5

Note: Clear lt1_variant from localStorage in DevTools if you want to re-test the split assignment.

IMPLEMENTATION TIMELINE

Earlier 2026	v1 (control) — original landing page Full form (name + email), headline + before/after + testimonials above fold.
Earlier 2026	v2, v3, v4 — paid ad variants Audience-specific headlines for LinkedIn ads. Email-only, form above headline. 50/50 split vs v1 per audience segment.
March 8, 2026	v5 — unpaid traffic variant General "Resume Guide for Engineers" headline for all non-paid traffic. Email-only, form above headline. 50/50 split vs v1. Counter: <code>1t1_counter_unpaid</code> .
March 8, 2026	Page count updated: 14 → 15 pages Updated across all 5 variants (JS) and 4 HTML references (top subtext, bottom CTA, What's Inside, cover image).
