

Process Improvement Question Attempt 2:

S: Was lead on Mercury 25 program (Q6). Had FLP using effort
- Was tested in Brazil for UPR.
We had 3 events from field. - requested harness back
- **Add "6 months from Prod."**

T: Do root cause, find solution, be ready for SOP.

A: - Gathered engineers
- Started checking harnesses and found root cause.
- Throb was not up to spec. - and spec was not on print.
3 min → I ~~add~~ death of supplier purchase
- I talked to experts on what test they would
- I met w/ ISG to make new spec
- "was inspired by supplier."
- I had supplier come fix harness in Mexico.

R: - Implemented print.
- Was used for SOP.
- Made spec go better than expected.
- For 2000 machine, FLP failure was saved.

Smile 30 sec

Lesson Learned - It was faster for me to lead this so close to production.

Feedback

- *1) Pay attention to competency/question
- *2) Think about impact beyond the task/experience itself.
