

Job Title: Senior Engineer, PDP Quality

Recruitment ID **120437** - Posted **05/12/2026** - **United States - Illinois - Factory Engineering (CA) - Onsite Position**

At John Deere, we run so life can leap forward. This powerful purpose is our promise to humankind that we will dream, design, and deliver breakthrough products that sustain our world for generations to come. The world is counting on us to feed billions of people and build vital infrastructures in villages, towns and megacities. And we live up to the legacy our founder forged in a one-room blacksmith's shop nearly two centuries ago by creating a culture that brings out the best in all of us. A culture where great ideas thrive because every voice is heard.

Your Responsibilities

As a **Senior Engineer, PDP Quality** at **John Deere Research & Development Center** located in **Silvis, IL**, you will plan, execute and manage Quality Engineering responsibilities for combine and front-end product development programs by applying sound judgement, technical knowledge and cross-functional leadership to deliver robust product and process outcomes. In addition, you will:

- Own quality outcomes and collaborate with design, manufacturing, PVV, supply chain, and quality stakeholders to align and deliver on quality objectives and priorities within assigned area(s) of responsibility.
- Provide technical consultation and guidance on program quality health and metrics, and risk based topics throughout PDP execution
- Drive for robust root cause identification and corrective actions with cross-functional teams in complex or ambiguous situations.
- Act as a mentor and resource for other quality engineers, sharing knowledge and best practices
- Apply strong professional judgment to balance quality rigor, program deliverables, and business needs
- Develop and maintain event management and disposition best practices with cross-functional partners to drive and support organizational goals

VISA Sponsorship is NOT available for this position

What Skills You Need

- 3 or more years of experience supporting PDP quality activities
- Working knowledge of quality principles, risk management, and cross functional collaboration
- Demonstrated ability to work independently and manage competing priorities
- Strong communication and collaboration skills with the ability to influence without authority

What Makes You Standout

- Experience as a lead contributor on PDP or global programs
- Depth in one or more quality domains (e.g., product quality, manufacturing quality, supplier quality)
- Experience coaching or mentoring other engineers
- Advanced degree or professional quality certification (e.g., ASQ Certified Quality Engineer)

Education

Ideally, you will have a degree or equivalent related work experience in the following:

- Bachelor's degree in Engineering, Science, or a related technical discipline (or equivalent experience)

Competencies

Deere is interested in hiring talented people quickly. Requisitions remain posted until we identify a qualified pool of candidates and no longer require a minimum posting period. We encourage you to review openings as they become available and apply in a timely fashion.

Must be 18 years of age or older to apply

\$93,324.00 - \$139,980.00 + Benefits

Follow this link to learn more about our employee benefits [Employee Benefits Summary Plan Description](#)

If you are moving to an area where housing and general expenses are significantly more expensive than at your departure location, the Company may provide a transitional benefit to help offset these costs for a specified period of time as a part of the relocation package. The Company will notify employees of their eligibility for this benefit based on a calculation provided by Runzheimer International. The calculation is based on a comprehensive assessment of all living cost variables and specific individual characteristics.

The information contained herein is not intended to be an exhaustive list of all responsibilities and qualifications required of individuals performing the job. The qualifications detailed in this job description are not considered the minimum requirements necessary to perform the job, but rather as guidelines. John Deere is an equal opportunity employer, including disabled & veterans.
