

Session w/ Subodh (5/20/26)

Applied to 2 positions:

- 1) current manager + same position in Waterloo.
 - 2) other manager.
- position closed.

10 ppl in manager org.

↳ 3 not interested

↳ 4 were S68 before SIRD.

Actions:

- send interview guides.
- send interview screen prep.

Mock Interview:

Intro: gave long intro

- listing what has done or can do.

Who you are/experience

specific about the role that has you excited

Why you be a good fit.

Behavioral - 8:30

S - currently working in automation.

- 20 Vision units / day.

- For units, I bring team together and go through them.

- If not resolved in 3 weeks, make CARs and have endline policy.

T - Bring people together to resolve.

- Create CAR, CA or bugs to SW team

- I needed to have metrics in place.

A - Started thinking how I can solve problem.

- Started working w/ PVR folks (they had some problem)

- talked to my leadership and all agreed IS6 is bottleneck.

positive

- Connected w/ QE's in IS6 and explained I don't have contacts to address on time

- Escalated to high levels of IS6 SW (Chetka Ghone)

- I led Harvika in meeting to have someone assigned in IS6 to assign bugs.

- I initiated meeting to discuss.

After 6 months of meetings, we had new instructions for all of IS6.

how many meetings?
how many people?

- preparation for meetings
- work outside meetings

work

R - bugs get resolved or solved/distributed in 2 weeks

- unified work instruction across all units. $\Rightarrow$ paint impact/scope.

- bugs assigned

- achieved metrics (took 6 months) $\rightarrow$ what they were?

- no ambiguity. now requiring constantly others so much. $\rightarrow$ time savings metric

(LU) - if you speak up & ask for what you need, you'll get a lot of help.

BT - if I initiated this earlier, would have been better.

$\rightarrow$ If I would spend more time up front laying out roles/responsibilities sooner.

$\rightarrow$ mention in Results $\Rightarrow$ positive feedback from manager on this initiative on GPMS.

$\rightarrow$ even though I was S67, I was able to take initiative when it needed it. So rank/position doesn't limit impact
