

Celeste Soon Ramseyer

celeste.ramseyer@gmail.com | (805) 296-2774 | Los Angeles, CA

EDUCATION

California State University, Long Beach

B.S. Aerospace Engineering

Graduated December 2025

LANGUAGES

Fluent: English, Mandarin, Cantonese, Malay

Intermediate: Indonesian, German

PROJECTS

Naval Interceptor Missile - Senior Design Project

Jan 2025–Dec 2025

CSULB - Propulsion Subsystem Lead

- Directed the design of a Mk-41 VLS-compatible hybrid rocket motor, utilizing trade studies to optimize paraffin/AP/Al + N₂O propellant selection for safety and cost
- Engineered Python performance model that validated 13.8 kN average thrust and 60,425 N·s total impulse, achieving 0.71 s ignition and 10,450 m apogee (+14.3% beyond specification)

Airfoil Uncertainty & Error Analysis Research

Jan 2025–Dec 2025

CSULB

- Developed an uncertainty quantification methodology integrating XFOIL simulations with wind tunnel testing to provide calibrated results to external submitters. Engineered a Python/NumPy post-processing pipeline to automate the analysis of experimental wind tunnel data

Water Channel Laminar Flow Research

Jul 2024–Dec 2024

CSULB

- Collaborated with a PhD researcher with water channel flow visualization experiments using green laser illumination in a pump-driven flow loop; calculated Reynolds numbers in MATLAB and confirmed agreement with measured data, validating the experimental setup for laminar flow studies

Handheld Console Repair & Modular Synthesizer Building

Ongoing Personal Projects

- Perform SMD component replacement and trace-level PCB rework on handheld gaming consoles
- Execute end-to-end development of modular synthesizer, including component-level assembly and CAD enclosure design (SolidWorks/Fusion360) utilizing Fused Deposition Modeling (FDM) and Stereolithography (SLA) 3D printing

EXPERIENCE

Manufacturing Process Engineer (Contract)

Dec 2021 (multi-month contract)

Technology Company (NDA) — San Luis Obispo, CA

- Translated technical work instructions and operational procedures between English and Mandarin for the China-side manufacturing team, ensuring accurate implementation by factory floor staff in quality-critical assembly steps
- Standardized and digitized work instruction documentation, adapting process workflows from the original facility to the new deployment

SKILLS

Skills: SolidWorks (FEA), ANSYS Fluent, MATLAB, Python, AutoCAD, 3D Printing (FDM & SLA)

Other: Technical Writing, Soldering (through-hole & SMD), PCB repair
